This document — who it's for, why

Decision-grade brief for CEO / COO / CFO / CTO / Compliance.

Thesis: using the exact category name creates operational and reputational edge.

DPPCOMPLIANCE is a neutral banner to name, align, and accelerate DPP (ESPR) and packaging (PPWR) programs across group/value chain.

1) One-page decision

What it is. A strategic asset (.com) for DPP & product compliance: public portal, documentation, API, communications.

What it changes. Single entry point → shorter time-to-trust, lower cross-functional friction, faster adoption.

What you can deploy today.

- “DPP Readiness & Rollout.” Product-family mapping, DPP data model, supplier onboarding kits.
- Technical/API portal. Schemas, endpoints, QR/serialization guides, integrator sandbox.
- Ecosystem hub. Neutral FAQ, requirement matrix by family, operational playbooks (procurement, quality, IT).

Why it's defensible. Exact term with C-suite readability.

2) Context & milestones

ESPR. In force; 2025 Working Plan; 2025–2027 delegated acts (textiles, furniture, tires, aluminum/steel); ramp-up 2026–2030.

DPP. Registries/tools and obligations by families from 2026–2028 (per acts).

PPWR. Entered into force 2025; general application ~T+18 months; progressive duties 2026–2030.

Implication. Set a neutral, visible banner now to align product, packaging, and inside/out messages.

3) Three possible deployments

A. Industrial corporate (group program). DPP data governance, supplier tooling and steering. The domain could group program documentation and contact points.

B. Compliance SaaS / scale-up. A technical portal presenting an offering, documentation and interfaces. No commercial result is assumed.

C. Alliance / Institution (neutral hub). Shared requirement matrices and use cases; network effects and standard adoption.

4) Strategic edge of the asset

C-level clarity. Defensive via public .com. Re-use of content, kits, and connectors.

5) Market size & pressure

ESPR/DPP + PPWR implementation (2025–2030) entails meaningful CAPEX/OPEX (data, labeling, IT, supply chain). The market needs a narrative standard and a visible hub; **DPPCOMPLIANCE** provides both.

6) CFO anchors (obligatory)

6.1 Awareness & adoption. Communications, brand identity and change management need a project-specific organization and budget. No avoided cost is estimated here.

6.2 Project schedule. Audits and procurement depend on the buyer's scope and organization. The name determines neither timing nor cost.

6.3 Reusable synergies. Under one banner (.com), each euro is re-used → shorter time-to-trust, faster cycles, lower unit costs.

7) Investment logic (no public pricing)

A descriptive and memorable name. Its relevance depends on the intended use and alternative names. This brief quantifies no return, savings, time gain or commercial advantage.

8) Related assets / bundle option (1–2 max)

- passeportproduit.fr — French DPP anchor.
-

9) Clean acquisition process (Legal/Finance)

Scope of sale: dppcompliance.com only. No other extensions are included.

Escrowed transaction, fast technical transfer, invoice. Options: cash / staggered 40-30-30 / bundle. NDA and asset audit available.

Legal notice: descriptive name, no affiliation.
